THE IDEA - AI FOR EASE

Tech Stack

- Gemini CLI
- Gemini API
- Streamlit

The screenshot displays the 'AI-Powered CV Generator' web application. On the left is a dark sidebar with 'User Profiles' (a dropdown menu showing 'Mateusz'), 'Your Details' (input fields for Full Name, Email, LinkedIn, Location, and Target Role), and a 'Paste your raw CV details here' section. The main content area is titled 'AI-Powered CV Generator' and features three steps: 'Step 1: Provide Job Description' (with a URL input and a 'Scrape Job Description' button), 'Step 2: Review and Refine' (with a 'Rate CV' button), and 'Step 3: Review and Refine' (with a 'Generate PDF' button). Below Step 1, the 'Scraped Job Description' is shown as a list of keywords. At the bottom, a 'Generate Tailored CV' button is visible. The right sidebar contains an 'AI Feedback' section showing an 'Overall Score: 97/100' and a 'Score Justification' paragraph, followed by a 'Strengths' section with a bulleted list of feedback points.

AI Feedback

Overall Score: 97/100

Score Justification: This CV is an outstanding match for the job description, demonstrating exceptional relevance, significant quantifiable impact using the STAR method, and excellent clarity with strong keyword alignment. It presents a highly qualified candidate who clearly articulates their expertise and achievements in the context of the role.

Strengths:

- **Exceptional Relevance and Keyword Optimization:** The CV perfectly mirrors the job description's requirements. From the "Senior LIMS Expert" title and 6+ years of experience in regulated medical/pharmaceutical environments, to specific mentions of GxP,

AI Feedback for Job 1: Overall Score: 95/100

Score Justification: This CV is exceptionally well-tailored to the job description, demonstrating highly relevant experience with strong quantifiable impact using the STAR method, and an excellent command of required technologies and project types.

Strengths:

- **Exceptional Relevance and Tailoring:** The summary directly addresses the job description's target clients (DACH/US), project types (Data Science, AI, end-to-end), and the candidate's eagerness to contribute, showing deep understanding and high interest. This immediate alignment is a significant plus.
- **Strong Quantifiable Impact (STAR Method):** The experience section is a prime example of effective STAR. Achievements like "\$100K+ annual cost savings," "15% reduction in unplanned equipment downtime," "30% improvement in customer feedback processing efficiency," and "10% reduction in false positives" clearly demonstrate business value and impact, not just responsibilities.
- **Comprehensive Skill Alignment:** The "Skills" section is perfectly aligned with the job
